

Sprint 4 Plan - CSE 115 – Software Methodology

Product name: SlugEvents

Team name: Jullig Jammers

Sprint completion date: June 6, 2023

Revision number: 2.0

Revision date: May 23, 2023

· Goal: Establish a Google Map view of the existing Events

organized by user story: This section lists the user stories, in priority order from most important (top) to least important (bottom). Within each user story, there needs to be a list of tasks required to implement the user story, along with the time estimate for each task (preferably less than or equal to 6 ideal hours). This should look like:

User story 1: As a student, I would like to be able to send events to Google Calendar (Save events to google calendar)

Task 1 description: Connect send to google calendar button to backend

User story 2: As a student on campus, I would like to be able to learn more about different events by clicking on the map (Map Visualization)

Task 1 description: Have markers displaying event locations from parsed locations

User story 3: As a student on campus, I would like to be able to filter different events with map visualization (Map Visualization)

Task 1 Description: Make a pop-up menu when the location pin is clicked

Task 2 Description: Pop-up menu contains event specifics

Task 3 Description: A button to close the pop-up menu

Total for user story 1: 4 hours

Total for user story 2: 10 hours

Total for user story 3: 10 hours

- **Team roles:** Give a listing of all team members. Next to the team member, list their role(s) for this sprint. Assign each person to at least one role (for example, this role might be "Developer"). This looks like:
