User Stories Defining Scope of Release

Sprint 1 (scrum master: Derek, Rey)
- As a developer, I want to become familiar with the technologies we will be using on this project.
- {1} As a student, I would like to be able to scroll through a list of events and choose the one I'm interested in (3)
- {10} As a student, I would like to be able to comfortably read through different events (2)

Sprint 2 (scrum master: Avneesh)
- {2} As a student, I would like to be able to read the specifications of events (20)
- {3} As a UCSC Student, I would like to filter events through different colleges (8)
- {4} As a club member, I would like to be able to view club-specific events (2)
- {5} As a student, I would like to be able to create events. (5)

Sprint 3 (scrum master: Alex)
- {6} As someone who's on campus, I would like to be able to have a map to visualize events on campus (13)
- {7} As a student on campus, I would like to be able to learn more about different events by clicking on the map (3)
- {8} As a student on campus, I would like to be able to filter different events with map visualization (8)
- {9} As someone bored, I would like to know what events are near me. (20)

Sprints 4(scrum master: Ed)
- {7} As a student, I would like to be able to send events to Google Calendar. (2)

- {8} As a student I would like to be notified of events I'm interested in. (2)
- {11} As a student, I would like to know how many people are interested in attending specific events (8)

Platform

- Programming Languages: HTML/CSS, javascript
- Firebase
- React - Native

Product Backlog

- As a user, I would like to upvote certain events that I think will be the most interesting.
- As a user, I would like to view events in the app without manually inputting them.
- As a user, I would like to see what events are near me in real time.
